COMPLETE THE DATA QUALITY SURVEY

The Data Quality subgroup of the EOSC Association's *Task Force Fair metrics and Data Quality* created a survey intended to capture needs and expectations for data quality from a wide range of stakeholders. Your responses will help to identify common approaches and formulate recommendations to support data quality within EOSC (European Open Science Cloud).

Fill in the survey, it will take around **10 minutes** of your time and will be open for you to respond till **Thursday 5th May**.

By completing all answers, we are happy to acknowledge your contribution in the forthcoming EOSC data quality recommendations.

Please email us back (carlo.lacagnina@bsc.es) if you would like your name to be included in the formal acknowledgement. For any further feedback do not hesitate to contact us for an individual interview.

Your opinion is very important for shaping the EOSC!
